Presenting a consistent set of global data related to car benefit policies and car costs, these publications provide HR managers with a deeper understanding of how policies differ by market and region.

In nations with already generous mandated leave, such as those in Western Europe, many companies simply rely on current laws and have not further expanded their paid-time off benefits. In countries with less prevalent, or even no legal requirement for paid parental leave, many companies have filled the void with additional paid or unpaid leave for mothers to care for newborn children.

Find out whether companies are providing the statutory minimums or going above and beyond to provide additional time off and/or pay to their employees.
